Purpose and Recommendation

Presentation of Marina Redevelopment Consultants Report for Phase II of the Marina redevelopment work.

Background

In summer of 2016, the Port of Seattle initiated a non-competitive grant program for cities in King County to enhance economic development opportunities. The City of Des Moines was awarded one of these grants based on the city’s population. Our grant award was for \$31,520 and the City matched the grant with an equal amount.

The grant and matching funds were used to procure the services of consultants to review the feasibility of various redevelopment options for the Marina. The Holmes Group (THG), under the leadership of Mr. Robert Holmes, was engaged to do this consulting work. Mr. Holmes engaged several additional consultants to review design feasibility, parking impacts in the downtown, development options and market demand analysis. A summary of the initial feasibility work was provided to the Council on May 18, 2017.

On October 17, 2017, a community open house was held on a donated, for-the-day, Argosy ship moored at the Marina to further discuss Marina development options and to listen to community preferences and concerns. There was significant interest expressed in an all-weather market facility, brew pub, wine bar, and casual dining, as well as some interest in retail shops, a boutique hotel and offices on the marina floor. The most preferred area for development was in the vicinity of the boat storage area, and the area near the Harbor Masters Office. There was also feedback that development could be located elsewhere in the Marina, particularly in the area of the current storage buildings and at the south end of the Marina.

In the fall of 2017, the City Council authorized the Phase II consultant contract with THG to look at the financial feasibility of development and Marina steps in the vicinity of the boat storage area, and to further refine the development concept for the overall marina floor. The Phase II contract is funded by an additional grant from the Port of Seattle.

City staff has been working closely with our consultants. Tonight we look forward to the consulting group presenting to City Council their findings regarding Marina redevelopment options.

AGENDA ITEM

BUSINESS OF THE CITY COUNCIL
City of Des Moines, WA

SUBJECT: Set a Public Hearing to consider Draft Ordinance 18-101 related to the Landmark on the Sound zoning reclassification.

FOR AGENDA OF: September 6, 2018

DEPT. OF ORIGIN: Community Development

ATTACHMENTS:

- 1. Preferred Land Use Map
- 2. Proposed Zoning Map Amendment

DATE SUBMITTED: August 30, 2018

- Courts _____
- Police _____

APPROVED BY CITY MANAGER
FOR SUBMITTAL: *[Signature]*

Purpose and Recommendation

The purpose of this Agenda Item is for the City Council to set a public hearing date to consider Draft Ordinance No. 18-101 amending Des Moines Municipal Code (DMMC) 18.10.050 (Adoption of official zoning map), to reclassify tax parcel 1722049023 from RM-900B Residential: Multifamily Zone to I-C Institutional Campus Zone for the Landmark on the Sound property. This action will bring the zoning into compliance with the preferred land use for the property in the City’s adopted Comprehensive Plan.

Suggested Motion

Motion 1: “I move to set a public hearing on September 27, 2018, or as soon thereafter as the matter may be heard, to consider Draft Ordinance No. 18-101 amending DMMC 18.10.050 (Adoption of official zoning map), to reclassify tax parcel 1722049023 from RM-900B Residential: Multifamily Zone to I-C Institutional Campus Zone for the Landmark on the Sound property.”

Background

The Institutional Campus (I-C) Zone was established in 2012 by Ordinance No. 1544. Des Moines Comprehensive Plan policy directed that an Institutional Campus land use designation that supported Highline College's Master Plan be established. In addition to the College, there were other large institutional facilities in the City that serve regional clientele, including Wesley Homes, Judson Park and the Highline School District that required a land use designation and zone that supported their uses, services, operations and facilitated their Master Plan redevelopment plans. There are currently three properties that are zoned I-C: Wesley Homes, Highline College and Judson Park. The Landmark on the Sound site has a Comprehensive Plan preferred land use designation of IC (Refer to Attachment 1), but was not rezoned at that time. The property is currently zoned RM-900B.

Ordinance No. 1701 was enacted on August 23, 2018, amending the permitted uses and associated development regulations in the I-C Institutional Campus Zone. The text code amendments further the vision for the *Des Moines 2035 Comprehensive Plan* by promoting development and redevelopment in a manner that strengthens community sustainability, livability and business vitality. The code amendments to chapter 18.95 DMMC – Institutional Campus and chapter 18.52 – Permitted Uses include modifying the purpose statement for the zone, adding to the list of permitted uses, modifying the master plan requirements, and clarifying other provisions of these sections of the DMMC.

Discussion

On May 23, 2018, the City of Des Moines received an application for a zoning reclassification from RM-900B Residential: Multifamily Zone to I-C Institutional Campus Zone for the Landmark on the Sound property (Refer to Attachment 2). As a result, the City Council must consider the application at a public hearing.

The rezone would bring the Landmark property into compliance with the City's Comprehensive Plan Preferred Land Use Designation. This rezone application is a Type IV land use action, and will be considered by the City Council in a quasi-judicial process.

Alternatives

The City Council may:

1. Set the public hearing date for September 27, 2018.
2. Set a different hearing date.

Financial Impact

There is no financial impact by setting the public hearing date.

Recommendation or Conclusion

Staff recommends that the City Council set a public hearing on September 27, 2018, or as soon thereafter as the matter may be heard, to consider Draft Ordinance No. 18-101.

Q&A/open discussion

OVERVIEW

PROJECT PARTNERSHIP

- Port of Seattle
- City of Des Moines

THE PROJECT TEAM

- THG
- The Concord Group
- Skylab

SCOPE OF WORK

- Update land use market analysis
- Develop concept plans for Marina Steps public amenity
- Financial feasibility analysis
- Identify strategy for Phase I development

AGENDA

Team introduction and scope of work

Review key findings

Discuss development strategies

Next steps

Q&A/open discussion

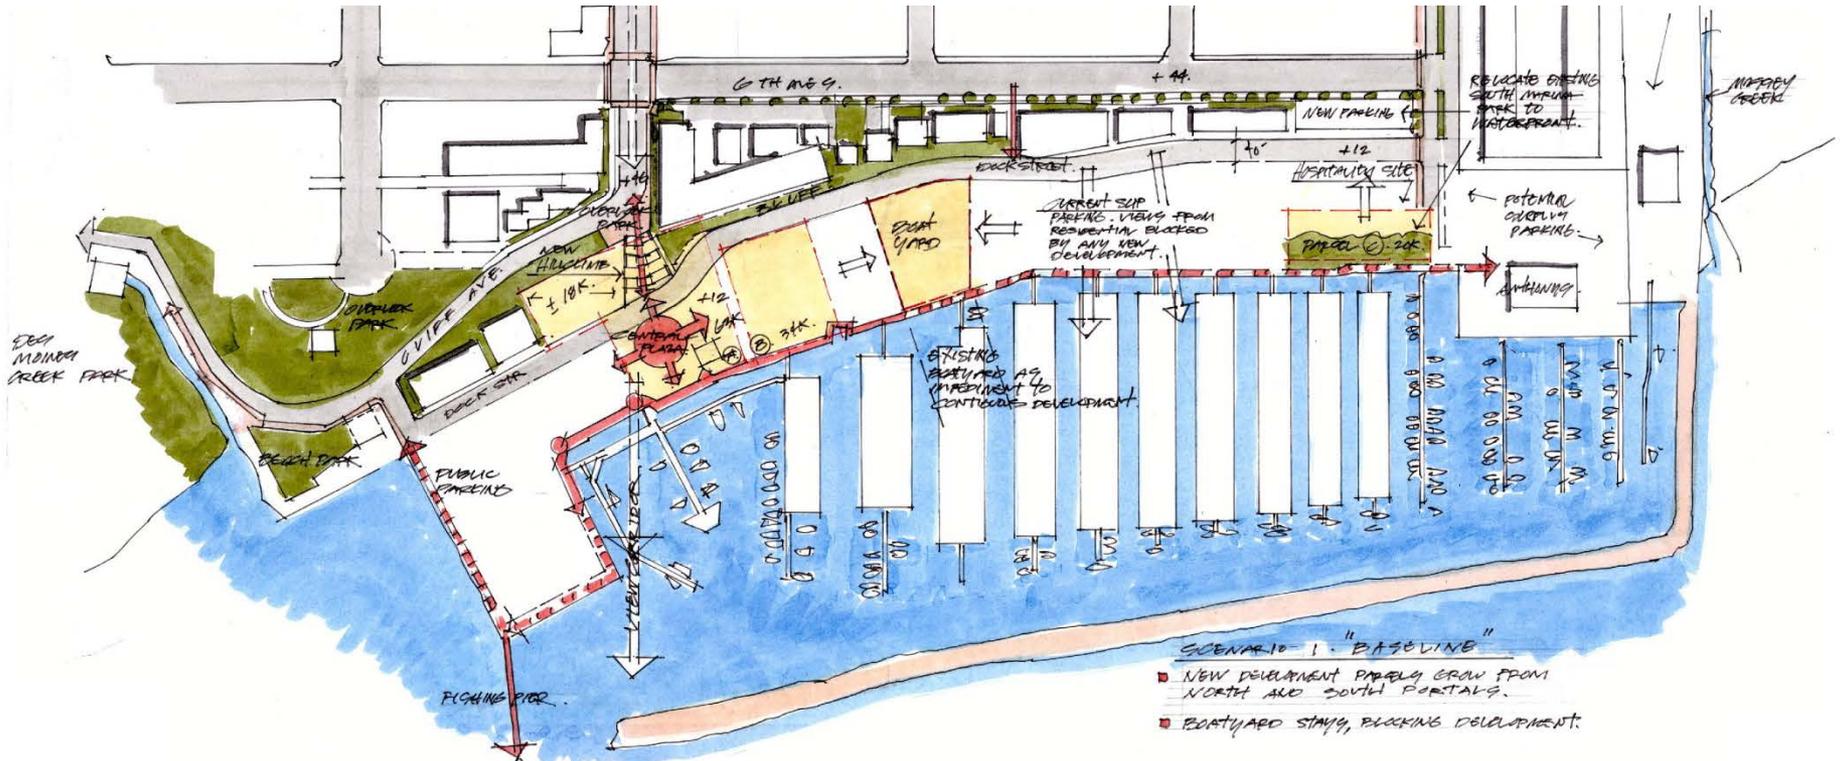

PHASE I WORK: KEY TAKEAWAYS

- Opportunity to develop various land uses given demand and supply trends, site location
 - Strong regional trends for residential and hotel
 - Tukwila hotel/apartments, SeaTac hotels
- Some constraints to development, including building height restriction (35') and minimizing impact on view corridors
- Potential to incorporate public amenities (i.e. Marina Steps, enhanced plaza) into development plans
 - Opportunity to enhance connectivity between Marina, downtown, Beach Park

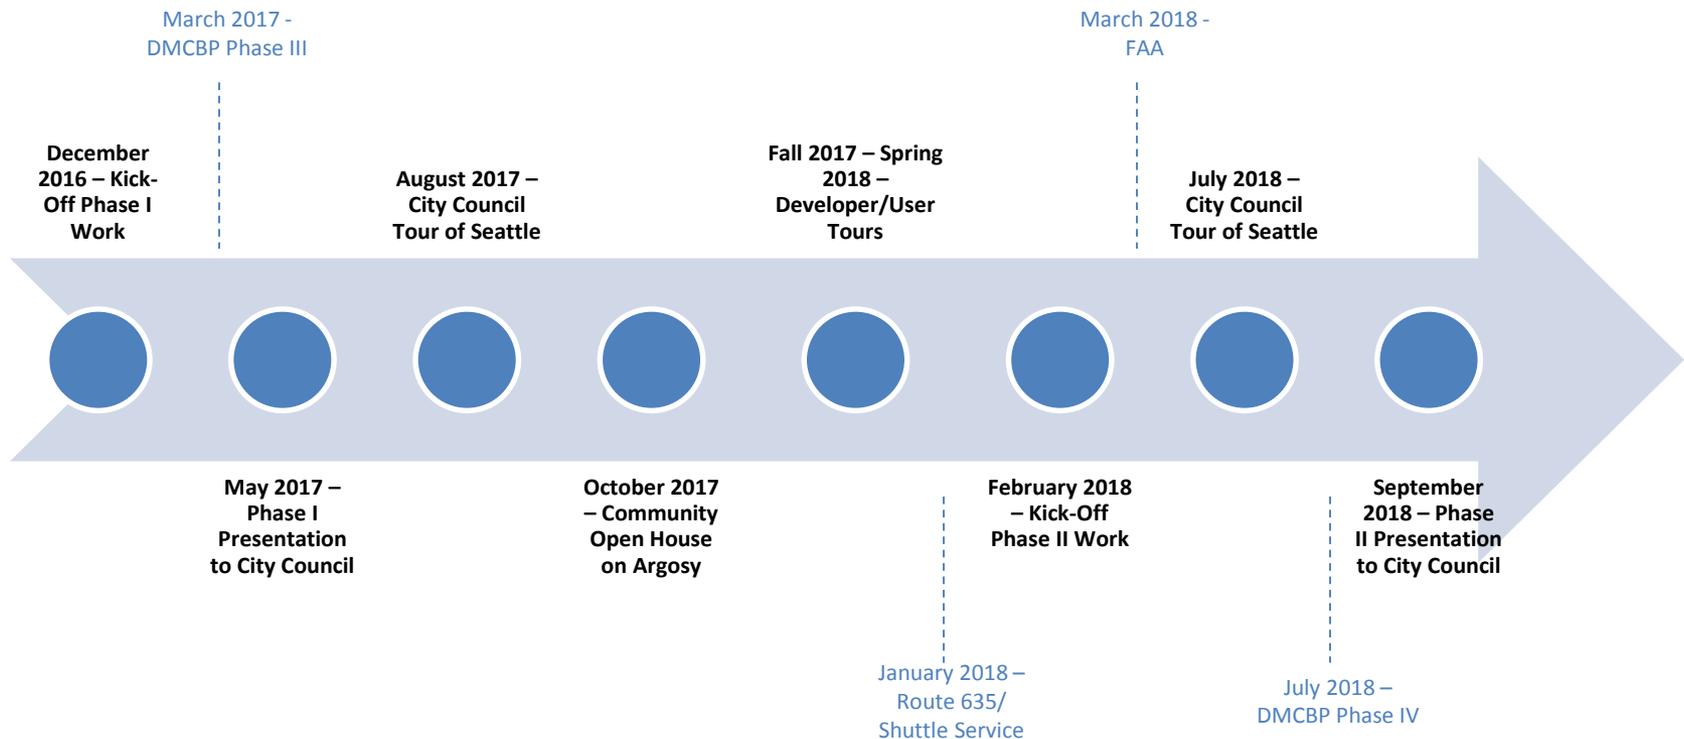

PHASE I WORK: DEVELOPMENT SCENARIOS

BASELINE	NORTH CONCENTRATION	MULTI-NODAL
<ul style="list-style-type: none">• Development concentrated in north, potential parcel on south end• Boatyard remains in current location• Up to 240,000 developable square feet	<ul style="list-style-type: none">• Development in contiguous zone entirely in north end• Boatyard moves to south end• Up to 240,000 developable square feet	<ul style="list-style-type: none">• Development concentrated on both ends• Boatyard remains in current location• Up to 330,000 developable square feet

HOW TO PAY

Upon boarding, pay your fare with the regional ORCA card. Get your ORCA card online at orcacard.com, by phone at 1-888-988-6722 (ORCA) or WA Relay: 711 (1-888-889-6368), at ticket vending machines in Sounder and Link rail stations, or at one of the transit agency customer service offices. The ORCA Web site also provides information on how to use the card, as well as locations at which they can be reloaded with a new pass or additional cash.

TRIP PLANNING

Use Metro's online Puget Sound Trip Planner desktop, generic mobile or Android or iOS apps to plan trips on scheduled transit service in King, Pierce and Snohomish counties. Trip Planner results include details about transit stops, routes and schedules. Trip planner itineraries do not include unplanned service disruptions or reroutes caused by weather, emergencies, traffic, events or construction.

Visit: kingcounty.gov/tripplanner

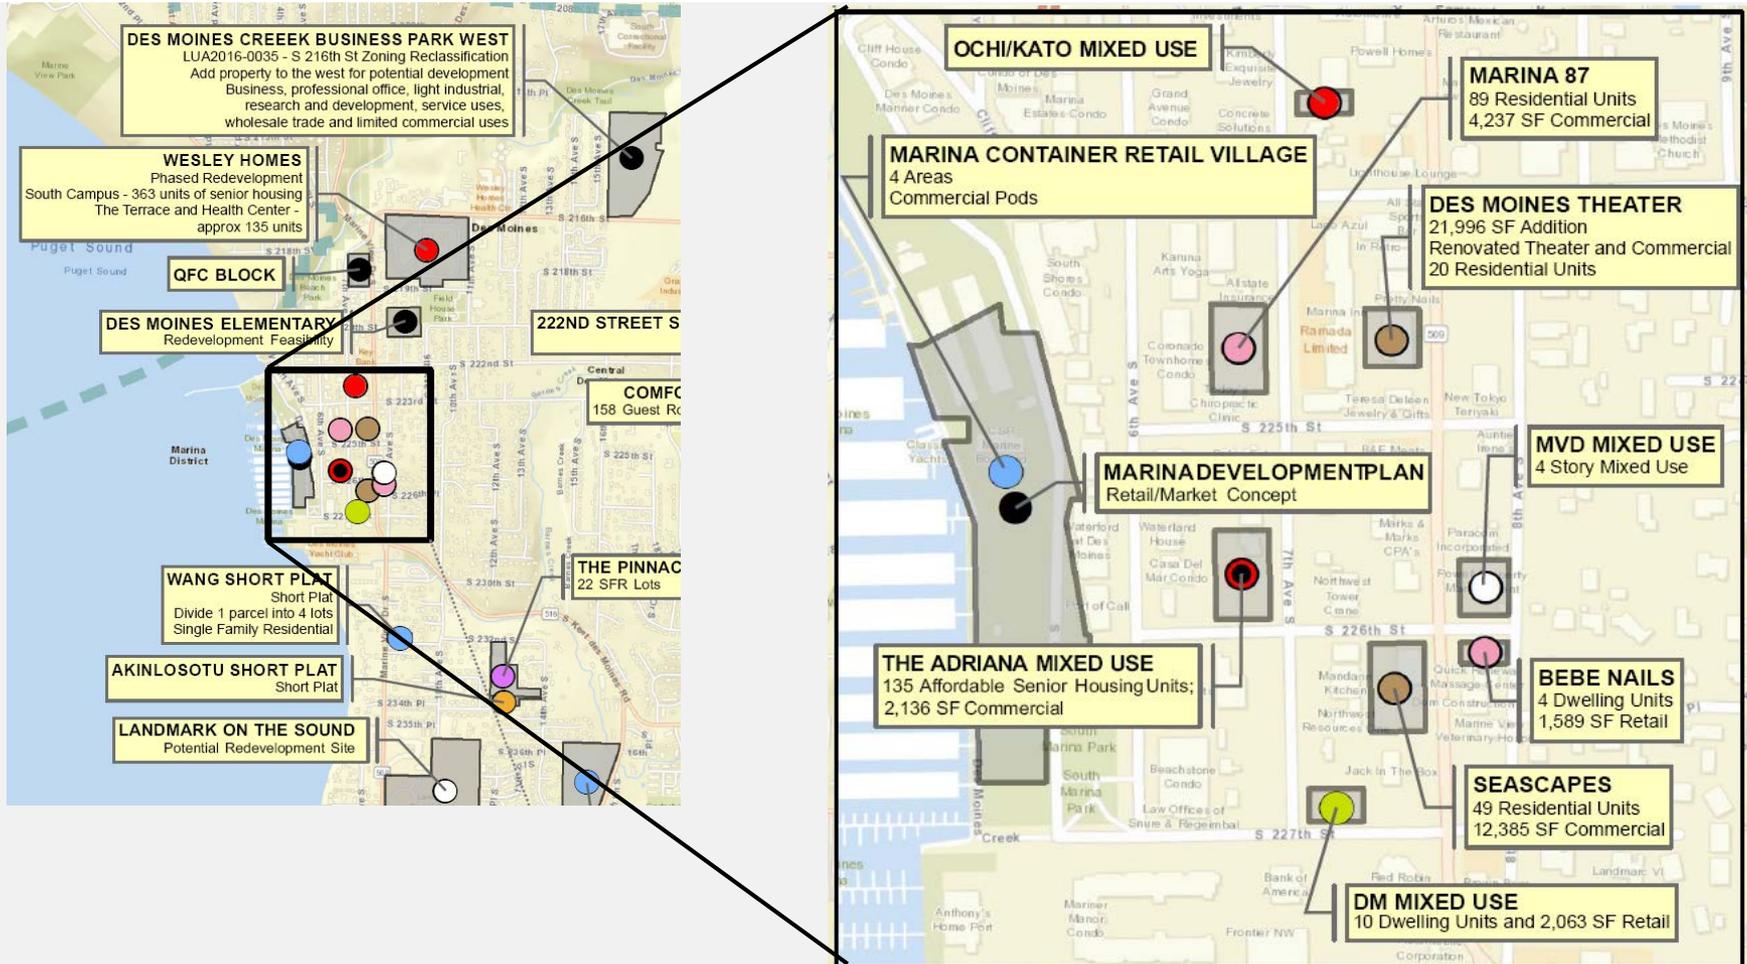

KEY LOCAL TRENDS

Potential redevelopment of Landmark on the Sound

KEY LOCAL TRENDS

And development activity in and around downtown

COMMUNITY INPUT

- October 2017 Open House – 200+ attendees
- Support for various uses on Marina floor, especially an all-weather market, casual dining, and brew pub
- Interest for development clustered around north end of Marina/Harbormaster House
- Followed up with tours with City Council

DEVELOPER INPUT

- Toured 12+ developers around City and Marina
- Public connector such as the Marina Steps would be catalyst to interest private developers
- Readily available interest for residential development (as function of regional market demand)
- Potential interest from hotel developer looking at new small-scale 'inn' concept
- Potential interest from brewpub
- Potential interest from mixed-use developers

MARKET ANALYSIS SUMMARY

	Residential (Attached)		Commercial (Lease)		
	Rental	For-Sale	Office	Retail	Hotel
Regional Trends (last 5 years)	Very Strong	Strong	Moderate	Moderate/Weak	Strong
Des Moines Market (current supply)	Dated product, mostly 1970s/1980s vintage	Dated product, mostly 1970s/1980s vintage	Dated product, small tenants	Dated product, small centers	Mostly dated product, new Sheraton
Key Demand Drivers	Employment growth; Millennial and empty nester preferences; amenities	Pent-up demand, especially from move-down/empty nesters; site-specific opportunities	Office-using employment growth; executive preferences	Household and income growth; consumer preferences	Employment growth; leisure trends; airport traffic; visibility
Pipeline - Supply Forecast (future supply)	Moderate supply	Minimal supply	Moderate supply, some large conceptual projects	Minimal supply, some large conceptual projects	Significant supply

SITE OPPORTUNITIES

- Water
- Views
- Parking options
- Large parcel, contiguous City ownership
- Proximity to downtown, Beach Park

SITE ANALYSIS: MARINA

POTENTIAL PUBLIC AMENITIES

POTENTIAL PUBLIC AMENITIES: MARINA STEPS

POTENTIAL PUBLIC AMENITIES: MARINA STEPS

Why build the Steps?

- ✓ Connects waterfront with Downtown
- ✓ Public amenity
- ✓ Attracts locals and tourists
- ✓ Catalyst for private investment and development
- ✓ Could be integrated with other community-desired aspects, such as food/beverage options with unique location, Marina parking

POTENTIAL PUBLIC AMENITIES: MARINA STEPS

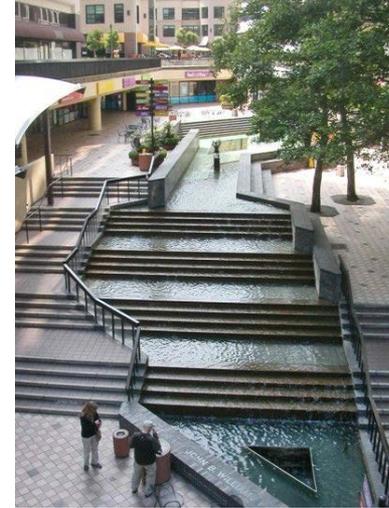

Potential Design

- Team worked through various designs in consultation with City staff
- Chose design that could be built as a stand-alone amenity or be integrated with simultaneous private development
- Worked with Geotech and cost estimator consultants to understand foundation requirements and costs

POTENTIAL PUBLIC AMENITIES: MARINA STEPS

POTENTIAL PUBLIC AMENITIES: MARINA STEPS

POTENTIAL PUBLIC AMENITIES: ROOF GARDENS

AGENDA

Team introduction and scope of work

Review key findings

Discuss development strategies

Next steps

Q&A/open discussion

ISSUES TO CONSIDER

- City's goals
 - Public access
 - Working marina
 - Revenue-generating
 - Mix of uses
 - Human scale
 - Assets for the community
 - Destination location
- Market-based demand
 - Current vs future
- Site constraints and strengths
- Phasing/timing
- Early phase successes
- Critical mass / activate

DEVELOPMENT STRATEGY

- Create vision
- Identify early-phase focus
- Determine how to best leverage City assets
- Parking strategy and other elements that can help catalyze private development
- Identify tenants and partners

DEVELOPMENT: POTENTIAL VISION

DEVELOPMENT: EARLY-PHASE OPPORTUNITY

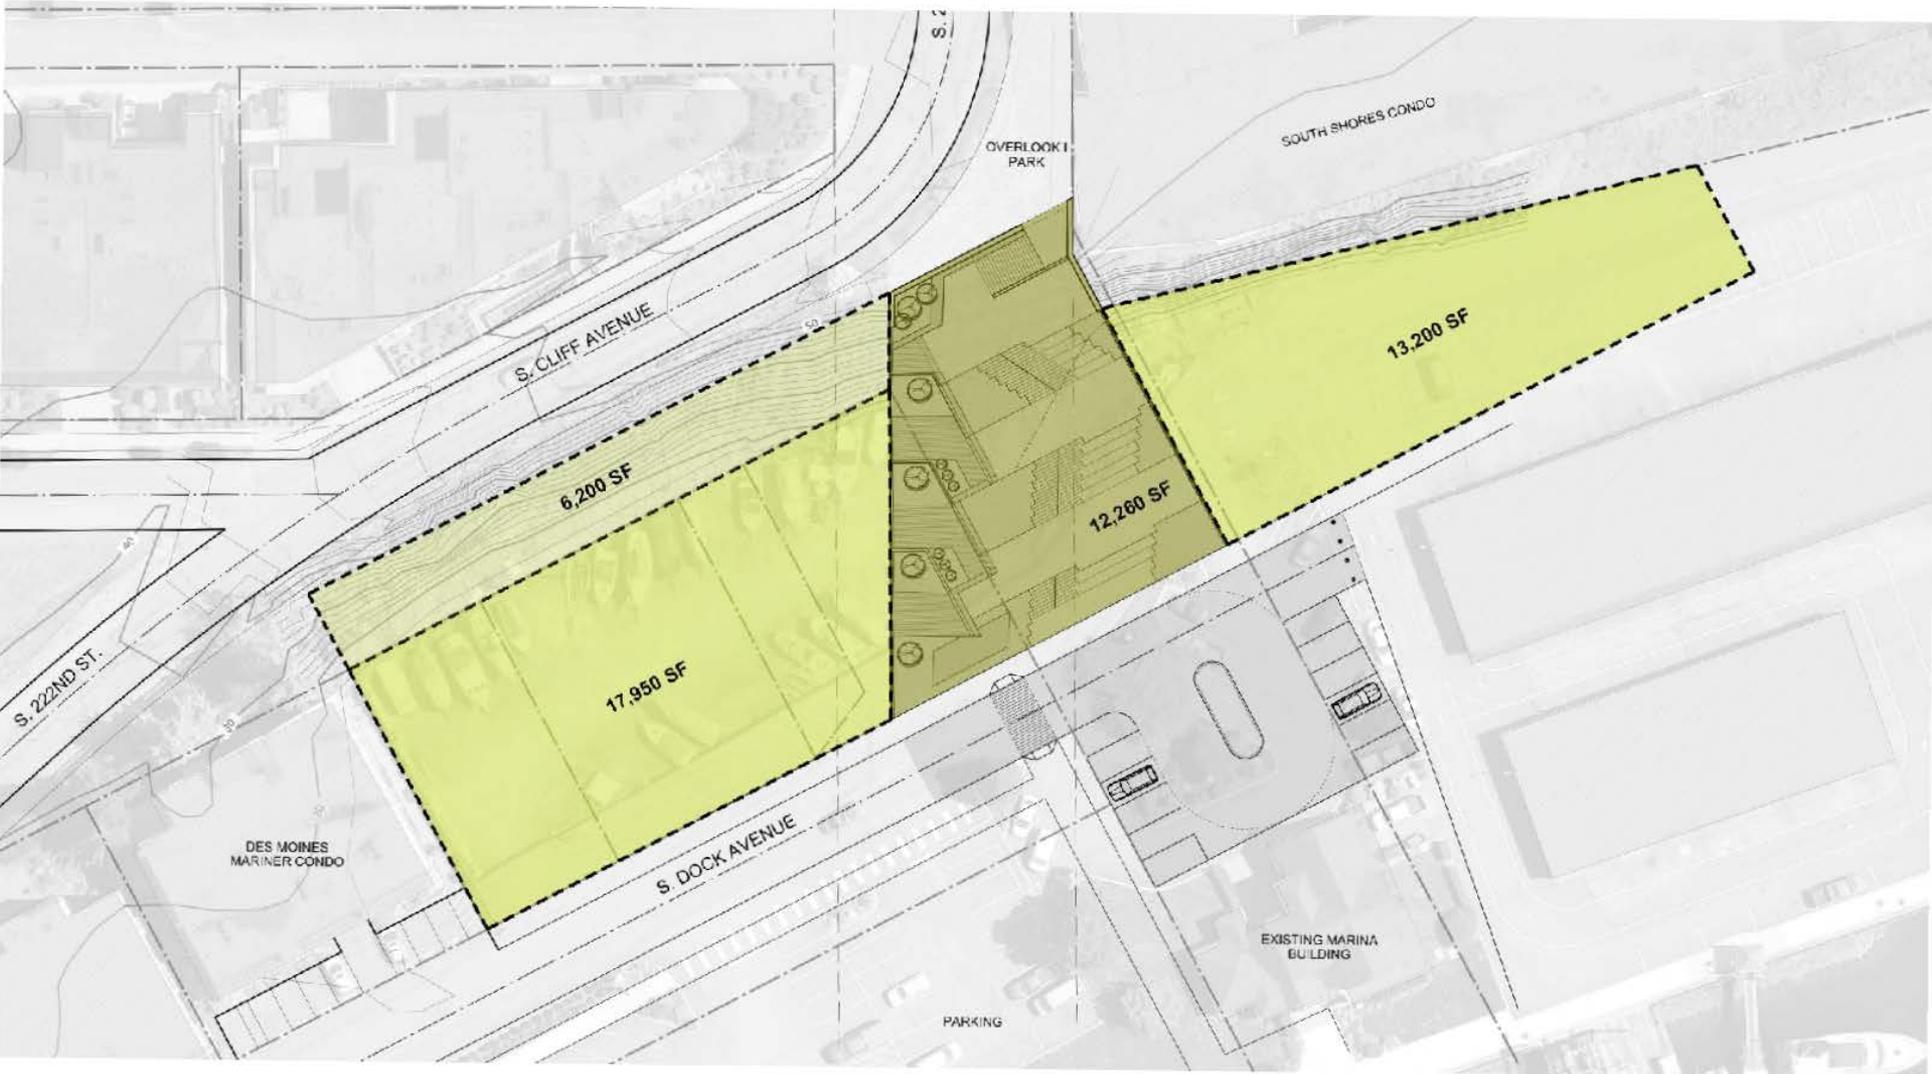

DEVELOPMENT: MARINA STEPS

- Engaged cost estimator
- Cost estimates (assume 30% soft costs on hard costs):
 - Option 1 – without elevator: \$2.5 - \$3.0 million
 - Option 2 – with elevator: \$3.5 - \$4.1 million

DEVELOPMENT: EARLY-PHASE OPPORTUNITY

- Marina Steps creates opportunity for private development parcels to north and south of stairs
 - North parcel (A) – 18,000 s.f. (with potential to increase if go into right of way)
 - South parcel (B) – 13,000 s.f. (with potential to increase southwards)
- At 2.5 FAR, up to 78,000 s.f. of developable space
 - Up to 35' tall, wouldn't block existing views
 - Could be integrated into design/development of Steps

DEVELOPMENT: EARLY-PHASE OPPORTUNITY

DEVELOPMENT STRATEGIES

SELL SPECIFIC PARCEL

- Marina includes +/-29 acres, possible sale of no more than 1-2 acres
 - First phase opportunity is currently boat storage
- Likely to attract most developer interest
- Sales proceeds can help pay for Marina Steps and/or other public amenities

GROUND LEASE LAND

- Likely to reduce developer interest
- More common for some land uses (i.e. hotel)
- Many different options, can get complicated
- Payments can help to offset debt costs for public amenities

PUBLIC-PRIVATE PARTNERSHIP

- Won't interest all developers
- Can take many different forms, can get complicated
- City brings land, regulatory authority, and bonding capacity, private developers bring their expertise in getting things financed and built

DEVELOPMENT POTENTIAL BY LAND USE

	Residential (Attached)		Commercial (Lease)		
	Rental	For-Sale	Office	Retail	Hotel
Site Potential	Strong	Strong	Moderate	Moderate	Moderate

Total Construction Cost per Net S.F (Hard, Soft, Finance)	\$292	\$325	\$258	\$219	\$379
Density/FAR	70.0	40.0	2.5	0.7	100.0

DEVELOPMENT STRATEGY: SELL SPECIFIC PARCEL

Values depend on many factors, including:

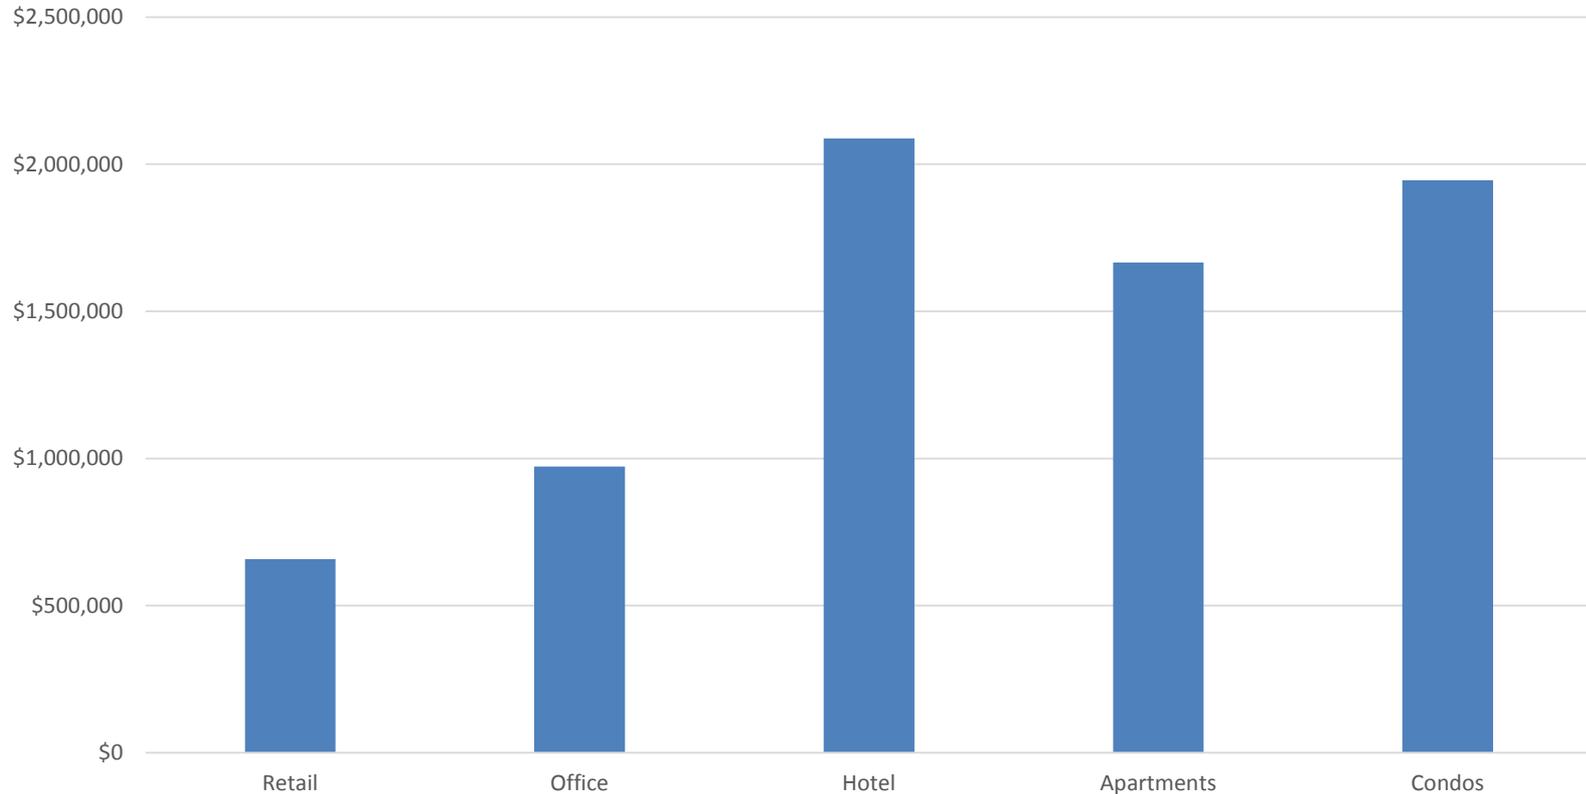

- Land use and resulting lease/sales values
- Development capacity based on zoning and other constraints
- Construction costs
- Parking
- Investor interest
- Market norms and trends

DEVELOPMENT STRATEGY: SELL SPECIFIC PARCEL

- Depending on resulting densities, land uses under consideration projected to yield between \$900,000 – \$2.9 million per acre
- Highest values for hotel and residential uses
- Land values highly sensitive to assumptions
- Parking is significant component – these values assume either shared parking with Marina or at-grade/tuck-under parking
 - Below-grade or other structured parking would introduce significant cost increase and resulting lower land values (and potentially negative land values)
- At 0.72 acres for 2 parcels next to stairs = potential combined land value of between \$660,000 and \$2.1 million

DEVELOPMENT STRATEGY: SELL SPECIFIC PARCEL

Residual Value - Parcels A&B (Shared or At-Grade Parking)

DEVELOPMENT STRATEGY: GROUND LEASE LAND

- Ground leases not common for many development deals
 - Most commonly associated with hotel development
- Developers and their capital partners will typically want long timeframes (i.e. 99 years)
- Leases don't typically begin until revenue earned (and often ramped up in initial phase)
- Need to consider time value of money (i.e. discount future payments)

DEVELOPMENT STRATEGY: GROUND LEASE LAND

- Ground leases can be determined on basis of:
 - % of determined/appraised land value
 - % of revenue
 - Other fixed rent amount or hybrid method
- At 5% of land value and discount rate of 6%, would take approximately 30 years to equal current sales values

DEVELOPMENT STRATEGY: PUBLIC-PRIVATE PARTNERSHIP

- Opportunity to leverage City assets and capabilities with private-sector development expertise
- Can take many different forms
- Can include modest or incremental incentives

Example: City provides land, private developer builds Marina Steps and adjacent private development

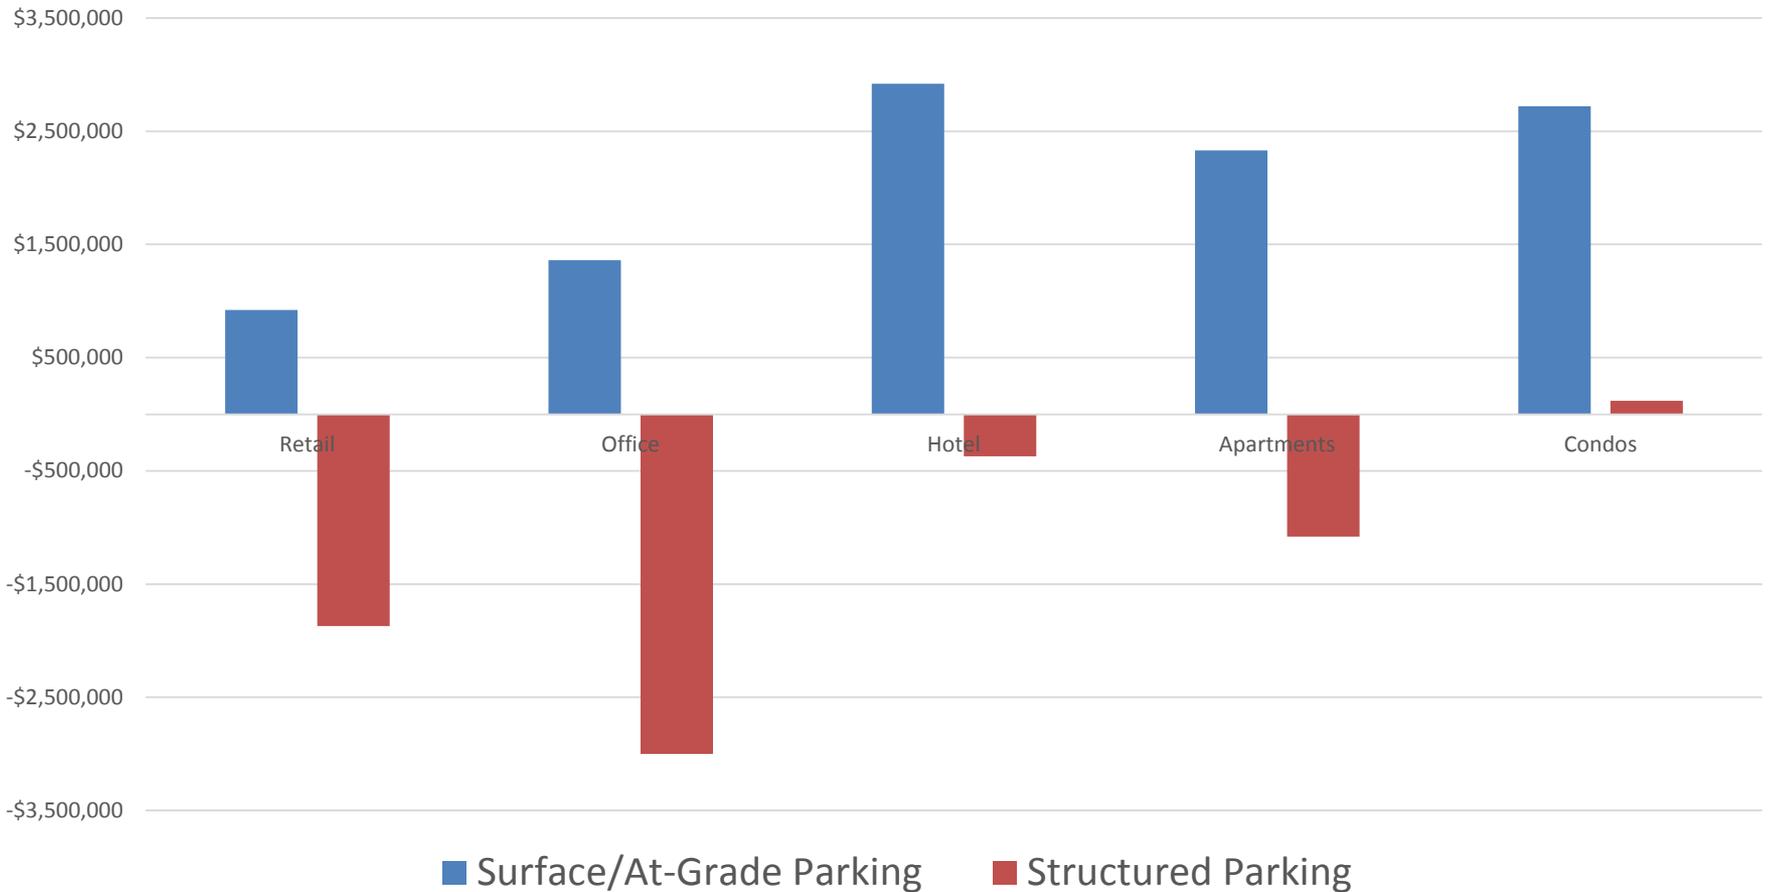

- City gets public amenity potentially at reduced out-of-pocket cost
- Developer gets control of larger site and ability to better integrate uses and leverage development costs

DEVELOPMENT: PARKING STRATEGY

- No existing parking spaces taken out for siting early-phase development
- Utilize existing surface parking to help incentivize early-phase development
- Parking costs can kill development deals – typical cost per stall is ~\$30,000 for above-ground and ~\$50,000 for below-grade
- Parking on small sites can also leave too little leasable/saleable space left over
- Look into integrating parking into Marina Steps development
- Potential to build structured parking later on as Marina is developed
- Financial partners often will require developers to have dedicated parking – they don't want their investments to be under-parked

DEVELOPMENT: PARKING STRATEGY

Residual Value per Acre

DEVELOPMENT: PARKING STRATEGY

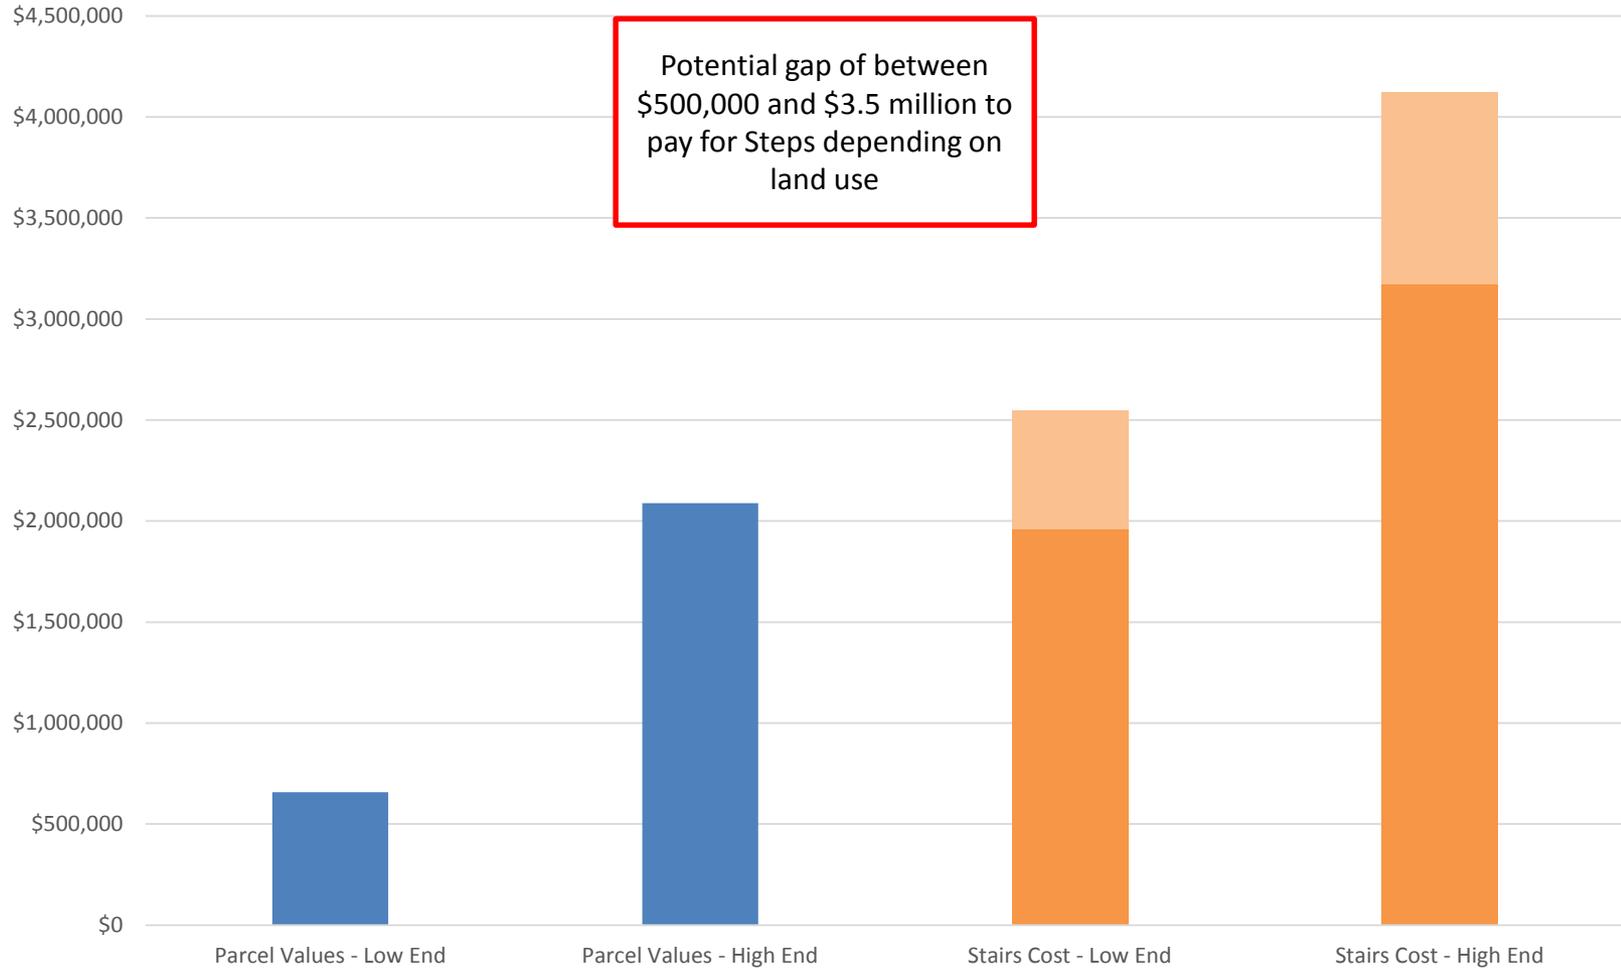

Potential surface parking
for early-phase uses

DEVELOPMENT: IDENTIFY TENANTS AND PARTNERS

- Office users (i.e. GSA, Port, co-working)
- Brewpub
- Hotel/Inn developer

DEVELOPMENT STRATEGY: FINANCIAL

DEVELOPMENT STRATEGY: RECOMMENDATIONS

- Utilize Marina Steps as catalyst to incentivize private development
- Allow for use of existing shared parking for private development concepts
- Find interested private developer to partner with on design and development of steps and adjacent parcels
- Fill 'gap' to build Steps:
 - Bonds
 - Public Private Partnership
 - Port

AGENDA

Team introduction and scope of work

Review key findings

Discuss development strategies

Next steps

Q&A/open discussion

NEXT STEPS

- Determine allowable uses
- Identify preferred development strategy and potential partners
- Design Marina Steps (refine costs, constructability)
- Prepare Requests for Proposals (proactively work with users/tenants and developers)
- Draft sources and uses/finance plan
- Waterside analysis
- Workplan timeline with assigned responsibilities

Q&A

Jerry Farmer

Marina Redevelopment Context

- 2012 – Marina & Beach Park Development Plan
- 2017 – Phase 1 Consultant Study – Design Feasibility
- 2017 – Community Open House for Marina Redevelopment Options aboard Argosy Boat
- 2018 - Phase 2 Consultant Study – Financial Feasibility

2012 Marina & Beach Park Redevelopment

- Community participation
 - Berk Consultants
 - Councilmember Musser was Liaison
- Came up with a number of recommendations that parallel our current recommendations, including
 - Boutique Hotel
 - Mixed – Use Development (Retail/Office)
 - Stairway (with elevator) Connection to Cliff Avenue
 - Restaurant
- Focus was on long term land lease with some consideration of selling small portion of Marina land

2012 Marina and Beach Park Redevelopment

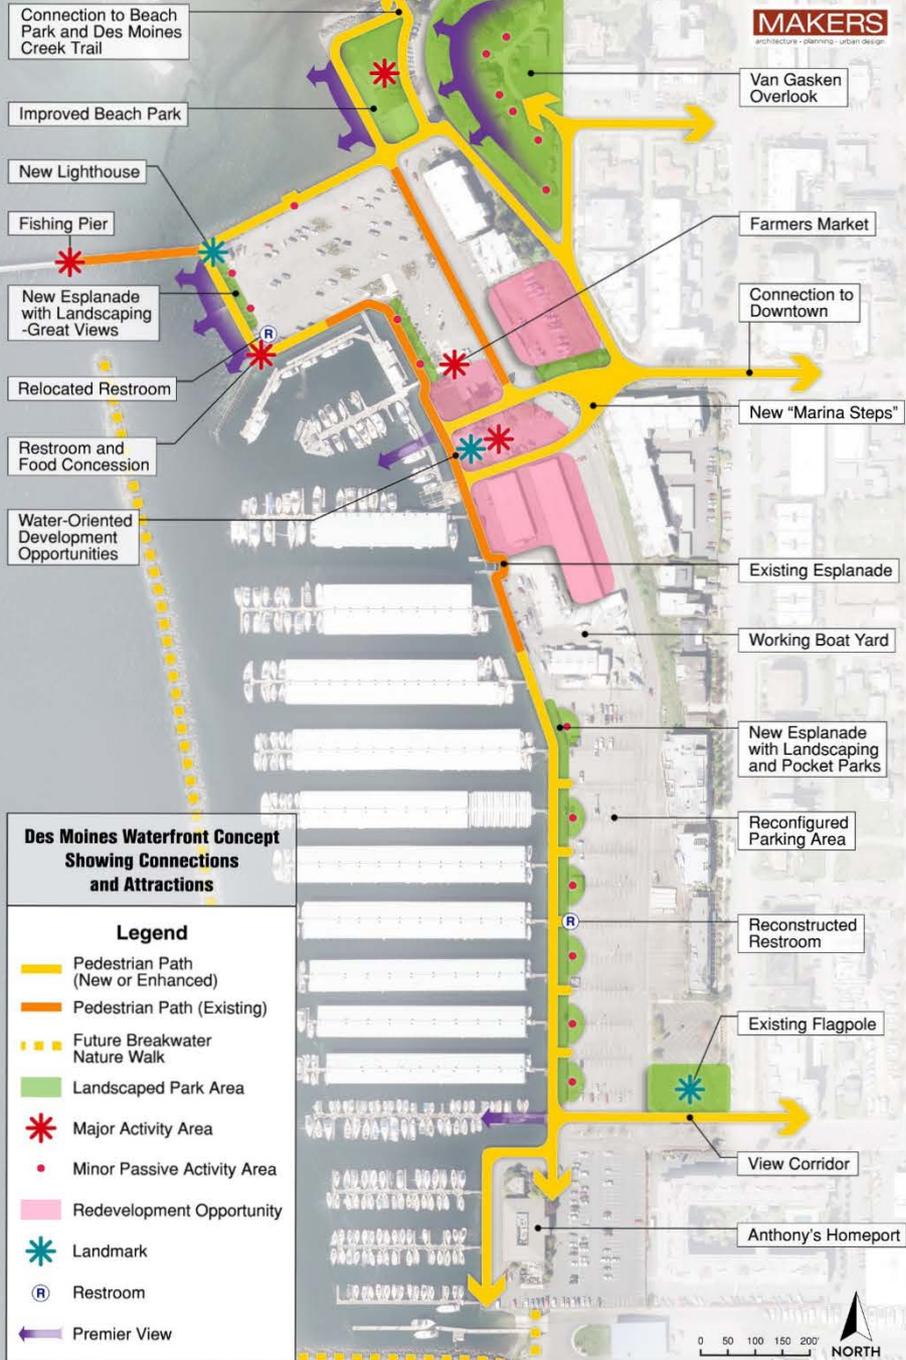

- City formulated and issued an RFP
- Received very poor response from Developers
- In the end, the City did not move forward with any of the RFP responses
- To the degree we have been able we have built upon this earlier work

Current Context – What Has Changed

- Different national macroeconomic circumstances
 - Reduction and stabilization of cost of capital = interest rate
- Regional competitive advantage
 - Especially cost of land
 - Growth in region and South King County
- 4,000-5,000 new jobs at the Business Park
- Opening of the Angle Lake Station
- Opening of 24th/28th roadway improvements
- Metro multi-modal shuttle service

Current Context – What Has Changed

- Transportation Improvements
 - Light Rail extension to Highline College and south
 - 509 Gateway Project
- Active development in the downtown; Theater
- Infrastructure Investment
- Investment in Public Space
- Integration of the public space/infrastructure to establish development patterns

Lesson #1: Plan your project's first phase as if you won't do another phase again

ROBERT J. HOLMES

It's well known that the first phase of a mixed-use project sets the theme, tone and quality level for the whole development. But what if the first phase was all that ever got built? Changes in the financing, regulatory, or supply/demand environment can and do change dramatically, and project planners need to think about the first phase as a 'stand-alone' development in and of itself. Essentially, the core planning principles must all be applied to this first phase – it must work out financially without needing cash flows from later phases, and it should have the right elements to establish 'critical mass' from the outset. We'll look at three case studies that illustrate this lesson in greater detail.

Build to Stand Alone

Harbor Steps was first envisioned as a 4-Tower mixed-use residential community in downtown Seattle. The centerpiece was a private park, loosely modeled after the Spanish Steps in Rome. At the time of the project's planning, the neighborhood was rundown with little residential. Financing was difficult, if not impossible, to find. Because of the difficulty of financing, the untested nature of this neighborhood for housing and the sheer size of the project, a decision was made to phase it over time.

The first phase, then perceived as the most risky, had to be designed and built in a way that it would 'stand alone' and work even if there were never any additional phases. This meant that the project's first phase would have to include concierge services, an athletic facility, sufficient parking, and retail services to work on its own (or in the case of the retail work with the existing retail already in place in the neighborhood) – and not rely on these amenities being delivered in future phases. Critically, the decision was made to construct Harbor Steps Park in this first phase, so as to link the project with the downtown and to help provide the 'sizzle' and the community excitement that this park and connection had finally arrived.

The construction of Harbor Steps Park in the first phase, and the need to include all of the amenities, was a burden on the budget and a challenge to finance. However, these elements provided the platform for success of this and subsequent phases. The remaining phases were brought on quickly given the rental success achieved in phase one and the resulting confidence of the developer and lenders.

Before and after development of Harbor Steps

Establish Critical Mass

Tremblant, a year-round resort in the Laurentian mountain range of Quebec, underwent significant redevelopment when Intrawest purchased the property. Besides building new ski lifts and amenities, the plan was to develop a car-free pedestrian resort village at the foot of the mountain.

Planned as a multi-phase development, the challenge of this project was in creating enough retail and commercial 'critical mass' in the first phase to attract and entertain visitors. Tourists did not care so much what was coming in the future – what mattered was what was there in that
