

Pacific Highway

Developer Opportunity

For the business owner or investor, a site along the Des Moines Pacific Highway offers a multitude of benefits – central location, convenient mass transit (including a planned light rail station), logistics, warehousing, and immediate access to Seatac Airport. Large available parcels feature stunning views of Puget Sound and the Olympic Mountains to the west, and Mt. Rainier to the south. All at attractive prices that represent significant savings compared with the three surrounding metropolitan areas of Seattle, Tacoma and Bellevue. These urban hubs are within a 25-minute radius, all with directly connected highway access.

The City government welcomes developers with a pro-active and friendly staff, a stream-lined permit process and a host of developer incentives. Companies can take advantage of all the industrial amenities of the area, and at the same time, the scenic Des Moines waterfront and Marina are just a few minutes west. Des Moines Pacific Highway represents unbeatable convenience, and investment opportunity, for your company or business venture.
